xero TAX

“It gives you real-time insights, allowing you to advise and plan better”

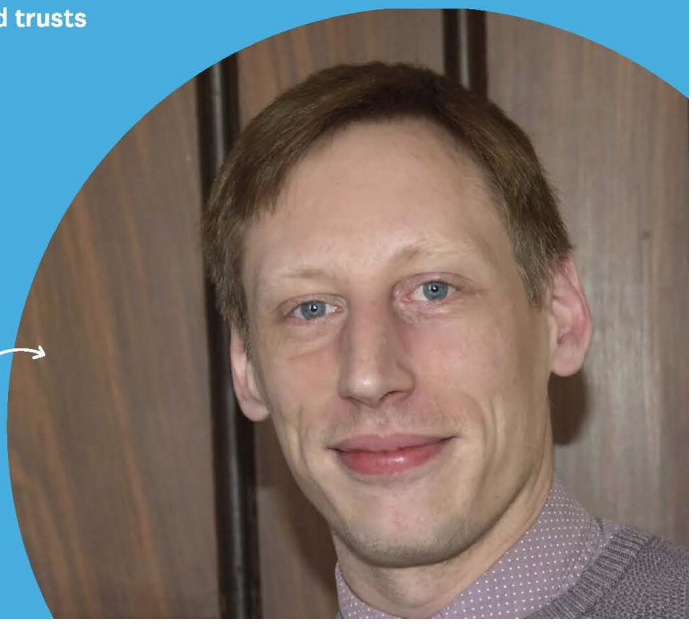

Xero Tax is the first cloud-based accounts production tax solution for accountants and bookkeepers in practice on the Xero partner programme. It’s included in your clients’ subscriptions, which means you don’t pay extra for it. In a recent survey, a third of respondents said that Xero Tax saved them over an hour per client job – it’s no wonder people like Richard are raving about it.

The following modules are now available:

- Corporation Tax and Accounts Production for micro entities
- Corporation Tax and Accounts Production for small companies (full accounts)
- Corporation Tax and Accounts Production for small companies (abridged)

Look out for personal tax, partnership tax, and trusts and estates coming in the near future.
