xero TAX

“It’s the best accounts production software I’ve used”

Xero Tax is the first cloud-based accounts production tax solution for accountants and bookkeepers in practice on the Xero partner programme. It’s included in your clients’ subscriptions, which means you don’t pay extra for it. According to Cheryl “It’s very quick and simple, and takes a huge hassle away of re-entering data.”

The following modules are now available:

- Corporation Tax and Accounts Production for micro entities
- Corporation Tax and Accounts Production for small companies (full accounts)
- Corporation Tax and Accounts Production for small companies (abridged)

Look out for personal tax, partnership tax, and trusts and estates coming in the near future.
