xero TAX

“It’s the best accounts production software I’ve used”

Xero Tax is the first cloud-based accounts production tax solution for accountants and bookkeepers in practice on the Xero partner programme. It’s included in your clients’ subscriptions, which means you don’t pay extra for it. According to Cheryl “It’s very quick and simple, and takes a huge hassle away of re-entering data.”

The following features are now available:

- Company accounts production
- Corporation tax
- Sole trader accounts
- Personal Tax

Look out for partnership tax and Making Tax Digital for Income Tax Self Assessment solutions coming in the future.
